

MAXWELL

100

IMPORTANT INFORMATION

1. Ensure the rods will fit correctly.
2. Ensure the deck is flat, i.e. not installed under any overhangs or cantilevers.
3. Identify any bushes, wiring or piped under the deck that should be avoided.
4. Ensure the mounting area is of appropriate strength to accommodate loads applied by capistrano/rod and rods.

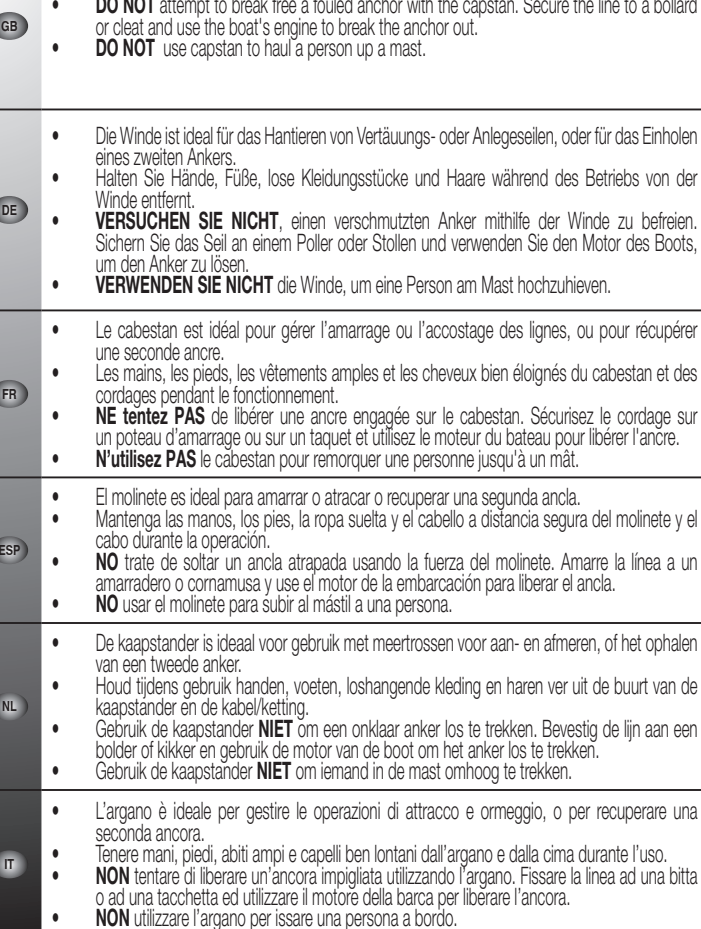

FITTING STEPS/INSTALLING STEPS

1. Use the Cut-Out Template as a guide for marking and cutting the holes.
2. Make sure the hole is aligned with the Capistrano rod.
3. To move or Cut-Out Template.
4. Mark out desired position for the holes.
5. Using hole saws and drill start drilling/cutting holes in order from A to C (as marked on the template).
6. Seal the edges of the hole with epoxy to prevent moisture ingress.
7. Adjust the capistrano with the rods cut into deck and lower into place.
8. Fasten the capistrano to the deck using the provided capistrano assembly. It is important the capistrano construction is insulated from the deck to avoid any risk of galvanic corrosion (e.g. steel or aluminium).

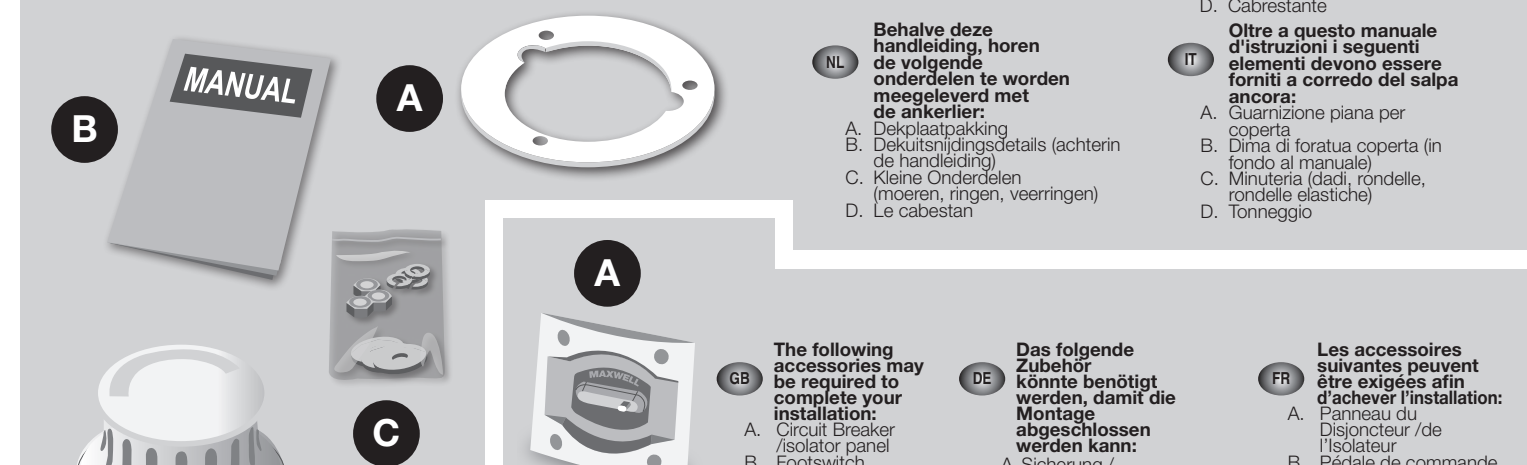

ANCHOR MAX™
